

LCA Downlight

A dimmable adjustable LED downlight, the LCA range is suitable for interior use and ideal for lighting all areas of your home, restaurant, or office.

Visually small when in situ, but disproportionately powerful in output, it produces a warm 2700k tungsten-like light as standard. Three optic beam widths are available: 20°, 26° and 48°, and also comes with an integral red LED, which can be operated on a separate circuit to preserve night vision during hours of darkness.

Format	Product code	Installation	Beam angle	Weight	Cut out	Wattage	Efficiency	Forward voltage	Current	Colour temperature	IP Rating	Lumen output	Standard finish
Adjustable	D6706	Interior	20°	0.2kg	57mm	9.0w	93lm/w	37.0v	260mA	2700k	IP21	577lm	White
Adjustable	D6707	Interior	26°	0.2kg	57mm	9.0w	93lm/w	37.0v	260mA	2700k	IP21	746lm	White
Adjustable	D6708	Interior	48°	0.2kg	57mm	9.0w	93lm/w	37.0v	260mA	2700k	IP21	610lm	White

Additional finishes are available on request. All fittings will require a driver. Photometry (IES file) and installation instructions are available on request.
